Dr. Baljeet Malhotra

Award-winning researcher known for his work in Open Source and API Risk Management

Web APIs have transformed the digital applications of enterprises across various industries. It's no surprise that APIs now contribute 83% of the Internet traffic on the Web. Given the importance of APIs in digital transformation at enterprises, it is imperative for Audit, Compliance and Security professionals to better understand basic API risks, that pose a challenge to their organizations. In this session, will:

- Identify various basic API risks that originate from within the enterprise API ecosystems.
- Provide an overview of an API Governance framework that effectively manages API risks.
- Highlight best industry practices and hands-on examples for API Risk Management.
