**CPE :** 1 hour

To register, please go to: <https://na.eventscloud.com/750587>

**Alexander Poizner**  
Chief Executive Officer  
Parabellyx Corporation

*Software development security has become an increased area of focus for organizations over the past few years due to high profile breaches and upcoming legal liability frameworks. This means that organizations developing software are looking to increase the security of the application itself rather than relying on compensating controls.*

*The webinar will provide you with the foundation knowledge about regulations, frameworks and components for application security assurance and expert insight and guidance on the initial steps in building such programs.*
